

February 2008

Important Note for CURRY 4.0 users

Subject: Online Renewal of Licences

Dear Valued CURRY 4.0 user:

In the past year, we have seen a spike in returned and undeliverable e-mails to customers scheduled to receive license renewals. This is typically due to the fact that many institutions, in attempts to block SPAM and Virus attacks, have severely limited access to outside e-mail addresses.

These increased limitations are most often the cause for delays or undelivered license renewals. In order to limit this problem we request that you provide at least one alternative e-mail address to which these renewals can be delivered. In addition you should add Compumedics and Neuroscan to your list of “SAFE” e-mail addresses.

Should you continue to experience problems, feel free to contact us to work out alternative methods of delivery.

Regards,

Compumedics Neuroscan
